Museum Complex of Levada de Tomar – CCG Arquitectos

*"The language of architecture isn't, in my point of view, no question of architectural style. Each building is built with a certain purpose, in a certain place and for a certain society".*

Peter Zumthor

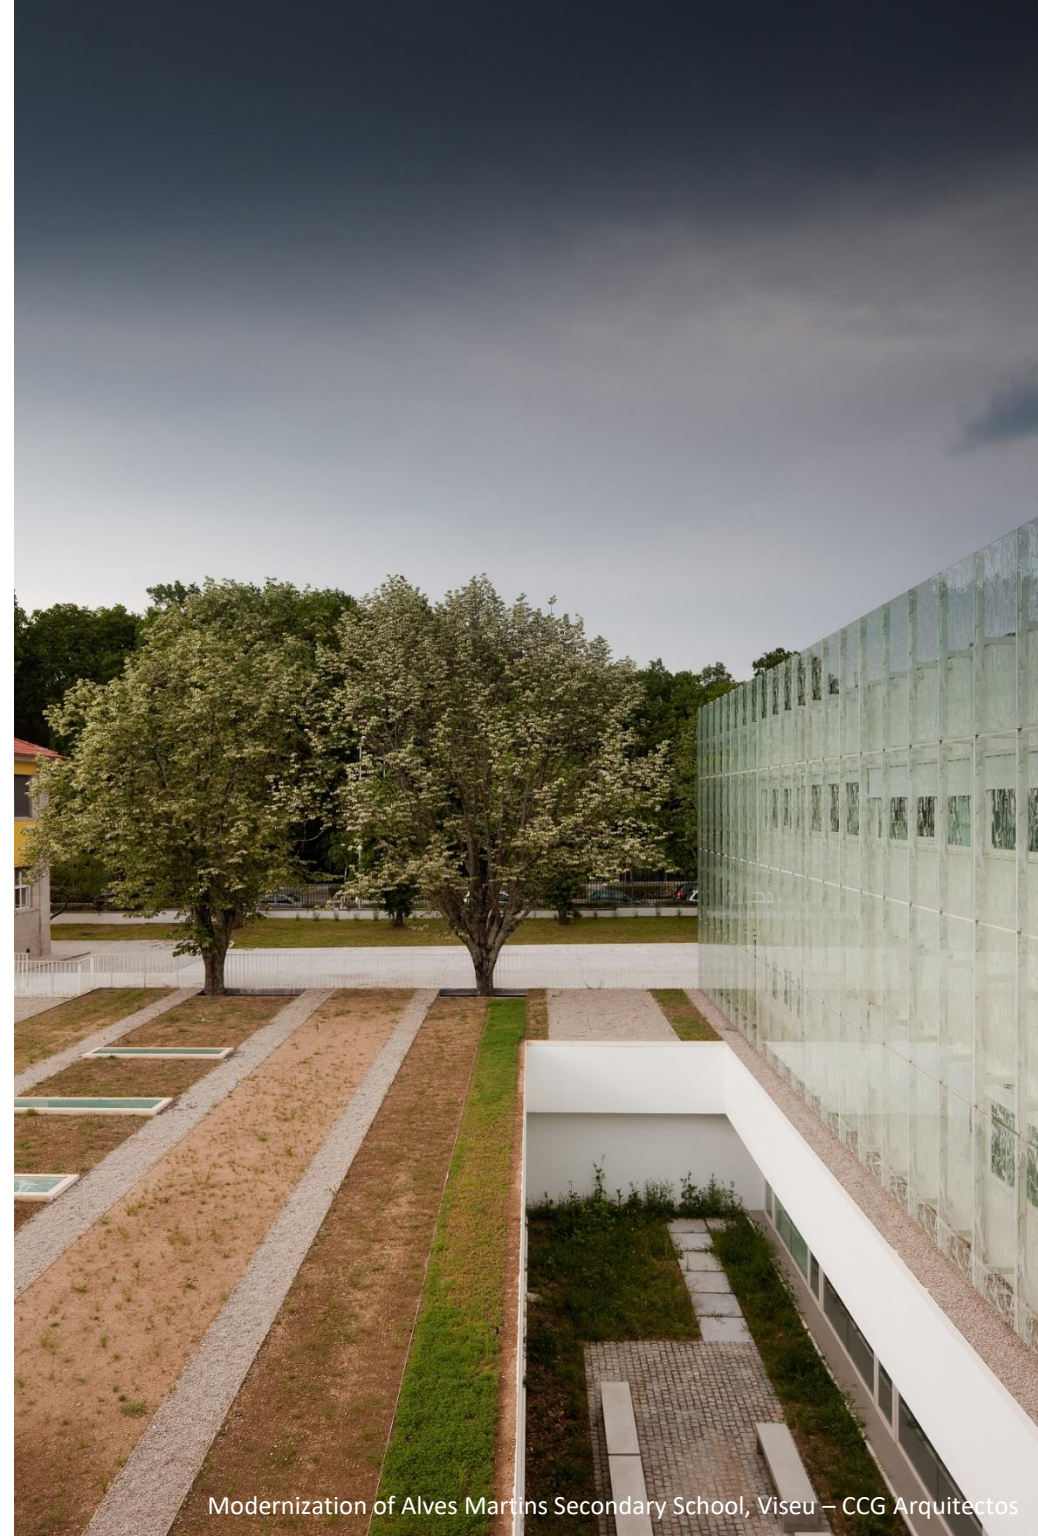

## OFFICE

A CCG Arquitectos is a Portuguese company headquartered in Lisbon, Portugal, and founded in 1994 by the Architect Cândido Chuva Gomes. Nowadays it has hundreds of projects realized both national and international.

The programs of the projects have been very vast, absorbing almost every typology, such as Urban Plans, Individual and Multi-Family Housing, Educational and Sports Facilities, Museums, Tourism and Recreation, Culture, Services and Rehabilitation.

## GENERAL AREAS OF ACTION

1. Studies and Projects – Coordination of Architecture and Engineering projects;
2. Interior design Architecture;
3. Consulting – Areas as diverse as drawing up tenders, construction management, real estate investments and others;
4. Real Estate;
5. Energetic Certification (only applied at Buildings in Portugal).

Modernization of Alves Martins Secondary School, Viseu – CCG Arquitectos

## PROFESSIONAL RESPONSE

Each challenge is faced in a serious and professional way through a complete and complex vision, respecting market conditions and the physical and cultural environment. The service is guided by ethical, moral and deontological principles.

## INNOVATION

All the projects are unique and personalized, thus allowing the design of a product that meets the specific needs of the client.

## INTEGRAL SERVICE

There are several areas of action that make us a high-value partner in Real Estate Development Projects, setting up customer support in all stages of the process, thus allowing the delivery of “move-in ready” real estate.

## EXPERIENCE

The Architect Cândido Chuva Gomes, Founding Partner and General Coordinator of the Projects, has been practicing architecture since 1978. He has accumulated experience throughout his vast career in renowned Architecture, Local and Central Administration Departments and as a teacher at the Portuguese Centre of Design and the Catholic University. Between 1988 and 2013, he also performed associative activities at the Association of Portuguese Architects and Order of Architects.

Due to a consolidated practice with very diverse programs and types, a dynamic and responsible technical structure was consolidated, composed of professionals specialized in the different project areas, with high experience and mastery of advanced technologies in order to respond to the most difficult challenges. To this end, several partnerships have been established.

## AREAS OF ACTION
